

# Update – COBOS 5.5.4

(updated on June 2025)

## Key Updates and Enhancements

### 1. Technical Modernization

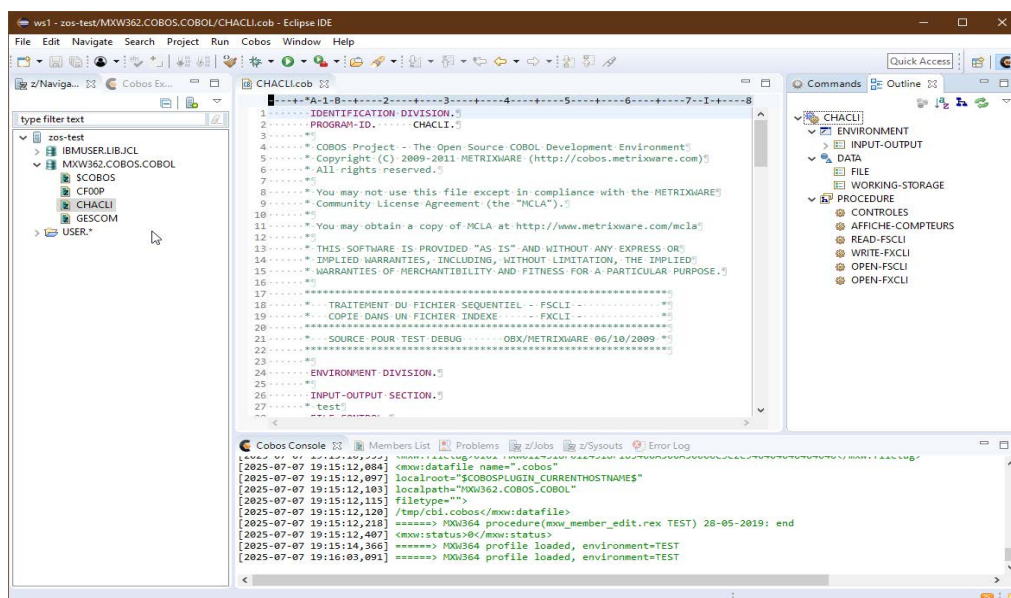

COBOS[4z] has undergone a significant modernization of its architecture, paving the way for faster and more effective innovations.

### 2. Enhanced Compatibility

- Adjustments have been made to fully leverage the latest Eclipse versions, ensuring a seamless and consistent user experience.

### 3. General Enhancements

This update reflects a commitment to continuous improvement, providing a strong and adaptable foundation to meet evolving user needs.

# Notices

- Starting with Eclipse 2022-12 (4.26), the z/Jobs and z/Search features are being adapted to enhance their compatibility with modern displays.
- Since Eclipse 2023-09 (4.29), TrafficPlayer cannot be installed due to the change in version of the SLF4J component supplied by Eclipse.
